FastSpeech 2: English and Telugu TTS

Implementation

Base implementation: ming024/FastSpeech2.

Training environment: Indiana University Big Red 200 HPC.

English

The English model was trained for 5,000 steps.

A checkpoint was saved at step 5,000.

Final logged training losses:

- Total: 4.4300

- Mel: 1.1586

- Mel PostNet: 1.1664

- Pitch: 0.8302

- Energy: 1.0353

- Duration: 0.2395

Five test utterances were synthesized.

Audio samples and visualizations are in Results/English.

Six training loss plots are also included.

Telugu

The Telugu audio and transcript dataset was prepared.

Configuration files were updated for Telugu.

Forced alignment, preprocessing, training, and inference

remain incomplete.

Limitations

Audio quality has not yet been independently evaluated.

The Telugu model and its required evaluation outputs are pending.
